

Short description

借助ES 00-h型电场源可以大范围地定位电场敏感点。通常这些敏感区在组件（例如LCD显示器及总线系统）上会达到1~15cm。ES 00-h型电场源也可用于耦合例如组件电缆中的干扰电流。

The edge of ES 00-h field source's head can be used for selective electrical coupling. The field source is powered by an EFT/ burst generator. The generator is connected to the 4.4 kV, high-voltage resistant SMB plug of the field source via a high-voltage cable (HV SMB 1 m or SMB-BNC 1 m).

Application with ES 00
