BPS 204-Client
BPS 204-Client Software

Short description

The BPS 204-Client software is used to control the BPS 204 Burst Power Station and the probes connected to it. The BPS 204-Client can be used to control the pulse parameters such as pulse frequency, pulse strength, pulse polarity and the options for external triggering (synchronization). The software is installed on the user's PC. A DLL (64 bit) is included for the implementation of own automatic measurement processes.
