

BT 706

Bias Tee for Langer probes

Short description

The bias tee is used for the power supply of active near-field probes of the Langer EMV-Technik GmbH, e.g. MFA or ICR. The bias tee is inserted into the signal path between the active near-field probe and the spectrum analyzer or oscilloscope and powered by a plug-in power supply.

Technical parameters

| | |
|-------------------|-------------------|
| Frequency range | 500 kHz - 6 GHz |
| Supply voltage | 12 V / 70 mA |
| Connector | SMA |
| Sizes (L x W x H) | (50 x 38 x 13) mm |

BT 706 bias tee with MFA-R 0.2-6 near-field micro probe
